

PERGOLAS TO CHENNIES WOODLAND

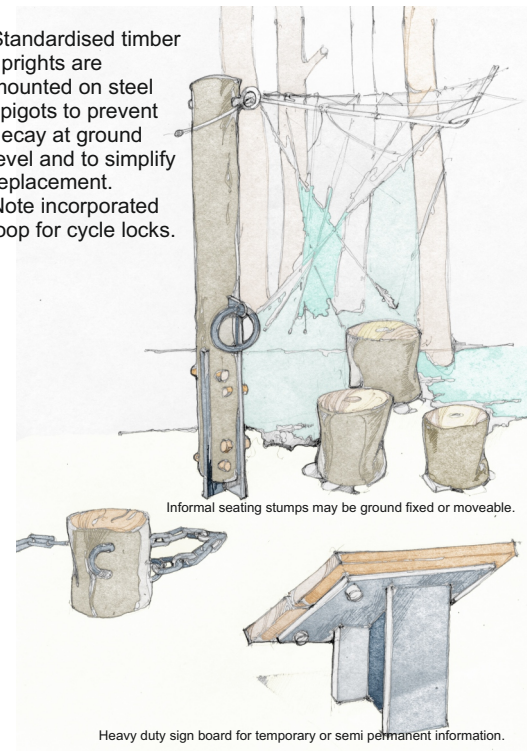

Where low visual impact is of importance canopies may be formed using fast growing climbing plants over a robust spider's web of cables, carried by timber uprights. Such an arrangement could be woven into, rather than displacing, existing woodlands.

Proposals for shelters to a combined art- trail & Sustrans cycle route, for Chiltern District Council.

Standardised timber uprights are mounted on steel spigots to prevent decay at ground level and to simplify replacement. Note incorporated loop for cycle locks.

Informal seating stumps may be ground fixed or moveable.

Heavy duty sign board for temporary or semi permanent information.
