

'Havant wave'
changes form &
colour with the sea
breeze.

ESTIMATE:

Fabrication: £60,000
Design Fees (CAD study/ structural analysis) £7,000
Installation £4,000
Decommissioning £4,000

TOTAL £75,000 *Inclusive of VAT*

Helical (at rest) spine of glass reinforced polyester rod, with stainless steel cable outriggers, with neutrally coloured fire retardant translucent woven polyester fabric, to take internal light wash.

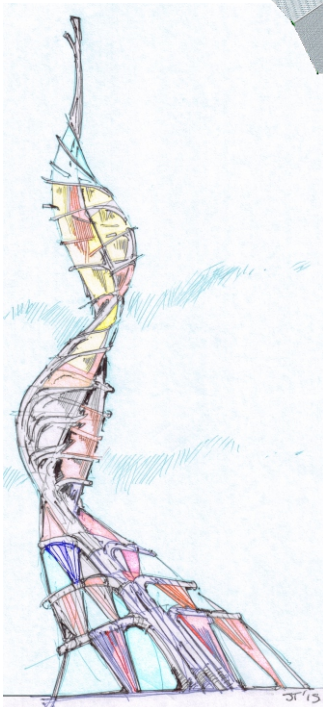

Sections open to the breeze part, pulling the structure downwards,

Spine thickens towards the base

Facing the sea breeze, this deliberately wave like structure is specifically designed to pulsate & mutate with the wind.

Alternative treatment using flared light emitting fabric to give an ethereal appearance by night.
